

## Stability Storage

The 5,600 square foot Stability Storage area provides controlled storage conditions for Research and Development, and Operations/Quality Assurance. The center includes a variety of controlled environments for the storage of samples and facilities to test these samples. In addition to housing areas for reach-in and walk-in storage at accelerated conditions, two rooms provide a total of 5,100 lineal feet of storage on mobile shelving units in controlled environments.

<b>Construction Cost</b>	\$900,000
<b>Date Complete</b>	Phase 1 - 1993 Phase 2 - 1995
<b>Key Personnel</b>	Julie Wellner, Margaret Smith
