

Unified Government of Wyandotte County City Hall Plaza Repair

- Relocation
- Abatement
- Demolition
- New Construction

The Plaza Repair project is driven by the vital need to repair the deteriorating and unsafe plaza around the Municipal Office Building. Prior to beginning the repair, the Police Department must be relocated so that the asbestos can be removed from the underside of the plaza structure. The exposed structure will provide valuable information in the final design of the necessary structural repair. The ground floor will be gutted and left unfinished for future tenant development. The plazas and garage will be demolished and replaced.

Although the structural repair of the plaza is the focus of the project, the architectural design will be the visible result. The design goals include creating a friendlier plaza, a water-tight plaza, and an obvious connection between the front door and pedestrians arriving from all directions.

Construction Cost	\$6,000,000
Date Complete	2006
Key Personnel	Julie Wellner, Jason Barker
