Wellner Architects conducted a study for the Unified Government of Wyandotte County / Kansas City, Kansas Public Health Department. The primary goal of the study was to investigate and establish a comprehensive plan for improvements to the 62,000 square foot space. Extensive site observation and interviews with Departmental Division Heads were conducted to establish a basis for the proposed improvements. Improvements proposed include space reorganization of the current divisions and programs, compliance with the Americans' with Disabilities Act and building codes, updating finishes, restoring exterior details, and the installation of an automatic sprinkler system. Update the mechanical systems and to install new windows for improved energy efficiency of the space was also proposed.
