

# Kansas City Missouri Schools Audit

Wellner Architects was part of an architectural and engineering facility assessment team that surveyed the condition of every Kansas City, Missouri School District building. Our team documented the deficiencies of each building and site, recommended an appropriate corrective measure for each deficiency noted, and estimated the cost of the work to remedy the deficiency. In addition, a prioritization was assigned to each deficiency indicating the importance of the particular repair.

<b>Construction Cost</b>	Varied
<b>Date Complete</b>	1994
<b>Key Personnel</b>	Julie Wellner, Marie Boatright, Secely Palmer
