

North Kansas City Middle Schools Classrooms Upgrade 604/704

New Mark Middle School
Eastgate Middle School
Northgate Middle School
Maple Park Middle School
Antioch Middle School

- **Nine classrooms in each school upgraded for Science teaching**
- **Roof replacement**
- **Auditorium seat replacement**
- **New casework**
- **New sinks**
- **New finishes**
- **Revisions to electrical & technology distribution systems**

This Wellner Architects, Inc. project includes classroom upgrades, roof replacement, and auditorium seat replacement at North Kansas City School District's five middle schools. The largest portion of the project involves upgrading nine classrooms in each school for use in teaching science. Upgrades include new casework, sinks, finishes, and revisions to electrical and technology distribution systems. The program was developed after surveying existing classrooms, comparing classroom conditions across the district, and reviewing the middle school science curriculum. Science classrooms in all schools were developed and estimated through schematic design. Classrooms in two middle schools continued through construction documents and were bid in October 2005. Construction on the first two schools occurred during the summer of 2006. Lessons from the first two schools will be incorporated into the final three schools which bid in the fall of 2006 for construction during the summer of 2007.

Client	North Kansas City School District
Construction Cost	604: \$850,000 704: \$879,000
Date of Completion	2007
Key Personnel	Julie Wellner, Margaret Smith
