*KCI Terminal Improvement
Project - Design*

KCI Fueling & Maintenance Bldg

Topping Elementary School

Clay has developed extensive experience in all phases of design including project management, construction documents, construction administration, and CAD design. Throughout his career, he has been exposed to many types of projects including airport terminals, educational facilities, transit, maintenance and warehouse facilities, office buildings, parking structures, telecommunication facilities, residential housing, and interior design of multi-plex theaters. Clay recently completed design and construction administration services for the expansion to Kansas City International Airport's three terminal buildings, and is currently providing design development and construction documentation services for the Kansas City International Airport's In-Line Baggage project.
