

# Station Casino Maincases, Highstakes and Bankrooms

This project reorganized and replaced all the existing wood casework, counter tops, and equipment in all the money exchanging areas of the casino with new, pre-finished metal casework and high-impact-resistant counter tops with metal edging.

An additional project with Station Casino was to swap locations of the existing PBX area with an existing office area. The project included taking an inventory of the furniture and field verifying the dimensions of the two spaces.
